https://github.com/Abdelrahman-2222/HTML-CSS-Template1
Simple webpage using HTML and CSS.

10/04/2021 – 08/06/2021
Online Book Reselling Software Web Project

It's a software online bookstore website that aims to help customers buy the books they need quickly and easily, where they can find the items they want without much suffering using HTML, CSS, and PHP.

01/01/2021 – 05/02/2021
Electricity Billing System

It's a java desktop application that aims to simplify the process of purchasing electricity bills and even complaining about them while the customer is sitting on his couch, as well as manipulating every action performed by the customer so that the admin can access the necessary staff without compromising privacy via the database.

10/12/2020 – 30/12/2020
Automatic Hand Sanitizer

It's an Automatic Hand Sanitizer Dispenser built with Arduino Uno and C programming language that allows the user to wash his hands and clean them without touching the dispenser, to prevent the spread of the virus.

VOLUNTEERING

01/03/2021 – 01/03/2022
Volunteering at Resala (Charitable Organization)

Online
I took part in an online volunteering program for blind people, writing down the necessary documents and texts and modifying them so that they could read them, and I was chosen as the best volunteer for March.
